M500

Dual-Sided, High-Resolution Identity Card Authenticator with Single-Pass Operation

STANDARD FEATURES

- Duplex Multi-Color Scanner
- Single Pass Operation
- Detects Full-Color Ultraviolet Marks
- RGB/Infrared Security Features
- High Performance 2D Linear Barcode Reader
- Integrated 3-Track Magnetic Stripe Reader

The M500 extracts and authenticates the hidden security features of any driver license or ID card, and reads and decodes barcodes and magnetic stripes.

With the card inserted into the M500, both sides of the card are simultaneously captured by the high-resolution imager.

M500 at US Airports

The M500 provides Enhanced Credential Authentication Technology at selected US Airports. TSA travel document checkers scan passenger credentials at airport checkpoints to read multiple security features from a passenger's identification card. The product's unique design features a single slot input independent of card orientation for ease-of-use and faster processing.

Ideal for:

Governments

ID Authentication

Airports

Age Verification

Casinos & Gaming

Bar & Night Club Access Control

Account Setup
